NIGERIAN EXPORT-IMPORT BANK

REPORT OF THE DIRECTORS

FOR THE YEAR ENDED 31 DECEMBER 2019

The Directors have the pleasure of presenting to the members of the Nigerian Export-Import Bank (the "Bank") their report together with the audited financial statements for the year ended 31 December 2019.

PRINCIPAL ACTIVITIES

The Bank was established to carry on the business of provision of export credit guarantee and export credit insurance facilities to its clients, provision of credit in local currency to its clients in support of exports, establishment and management of funds connected with exports, maintenance of a foreign exchange revolving fund for lending to exporters who need to import foreign inputs to facilitate export production, maintenance of a trade information system in support of export business and provision of domestic credit insurance where such a facility is likely to assist exports.

STATE OF FINANCIAL AFFAIRS

In the opinion of the Directors, the state of the Bank's affairs is satisfactory.

EVENTS AFTER REPORTING PERIOD

There are no events after the reporting date that require adjustments in the financial statements. Management has assessed the impact of the COVID-19 on the going concern of the Bank and has concluded that the use of the going concern is appropriate and that the Bank will be able to recover its assets and discharge its liabilities in the foreseeable future for at least the next 12 months.

Since early 2020, the Coronavirus disease (COVID-19) outbreak across China and beyond has caused significant disruption to the society, impacting the Bank, its employees and customers.

In Nigeria, it is an evolving situation and the Bank is monitoring closely, any impact will depend on future developments which are highly uncertain, and the Bank is still quantifying the impact.

The lockdown of the Country due to the virus could adversely affect the result of operations and financial position in 2020. The impact of the outbreak on key macroeconomic indicators will be taken into consideration when determining the ECL estimate under IFRS 9 in 2020.

The Bank has performed a line-by-line analysis of its statement of financial position and has done an assessment of whether the current uncertainty may impact any of the amounts presented at 31 December 2019. Management has concluded however that the amounts recognised in the financial statement do not require further adjustment but will continue to monitor situation as new information becomes available and adjustment thereof will be reflected in the appropriate reporting period.

RESULT FOR THE YEAR

	N'000
Profit before income tax	2,059,645
Income tax expense	-

Profit for the year	2,059,645
	=====

DIRECTORS' INTEREST IN SHARES

In line with Section 2 Subsection 1 of the Nigerian Export-Import Bank Act (NEXIM Bank Act) 1991, the authorised share capital of the Bank is subscribed equally by the Government of the Federation through the Ministry of Finance Incorporated and the Central Bank of Nigeria. In line with Section 2 Subsection 2, no new shareholders were approved, and there was no Director that held shares in the Bank during the year.

DIRECTORS' INTEREST IN CONTRACTS

None of the Directors has notified the Company for the purpose of Section 277 of the Companies and Allied Matters Act, CAP C20 Laws of the Federation Nigeria 2004 of any disclosable interests in contracts in which the Company was involved as at 31 December 2019.

EMPLOYMENT OF DISABLED PERSONS

It is the policy of the Bank that there should be no discrimination in considering applications for employment including those from disabled persons.

All employees, whether or not disabled are given equal opportunities to develop.

HEALTH, SAFETY AT WORK AND WELFARE OF EMPLOYEES

Health and safety regulations are in force within the Bank's premises and employees are aware of existing regulations. The Bank provides allowances to all levels of employees for medical care, transportation, housing, etc.

NIGERIAN EXPORT-IMPORT BANK

REPORT OF THE DIRECTORS - Continued

FOR THE YEAR ENDED 31 DECEMBER 2019

EMPLOYEES' INVOLVEMENT AND TRAINING

The Bank is committed to keeping employees informed as much as possible regarding the Bank's performance, progress and seeking their views wherever practicable on matters which particularly affect them as employees. Management, professional and technical expertise are the Bank's major assets and investment in their further development continues to be a priority to the Bank.

The Bank's expanding skills-base has been extended by a range of training programmes provided to its employees whose opportunities for career development within the Bank have thus been enhanced. Training is carried out at various levels through both in-house and external courses.

PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS

The financial statements are presented in accordance with the reporting and presentation requirements of the International Financial Reporting Standards as Issued by the International Accounting Standards Board, the Companies and Allied Matters Act, CAP C20, Laws of the Federation of Nigeria 2004, the NEXIM Bank Act No. 38, 1991, Laws of the Federation of Nigeria 2004 and the Financial Reporting Council of Nigeria Act No. 6, 2011 and other relevant circulars issued by the Central Bank of Nigeria.

AUDITORS

Ernst & Young having expressed their willingness to continue in office as the Bank's auditors in accordance with Section 357 (2) of the Companies and Allied Matters Act, CAP C20, Laws of the Federation of Nigeria 2004.

By Order of the Board

Mustapha Usman
FRC/2020/002/00000021506

Secretary to the Board
Abuja, Nigeria

Date: 12 October 2020

NIGERIAN EXPORT-IMPORT BANK

**STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF
THE FINANCIAL STATEMENTS**

FOR THE YEAR ENDED 31 DECEMBER 2019

The Companies and Allied Matters Act, CAP C20, Laws of the Federation of Nigeria 2004, requires the Directors to prepare financial statements for each financial year that present fairly, in all material respects of the state of financial affairs of the Bank at the end of the year and of its profit or loss and other comprehensive income. The responsibilities include ensuring that the Bank:

- a) keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Bank and comply with the requirements of the NEXIM Act of the Federation of Nigeria 1991, the Financial Reporting Council of Nigeria Act No. 6, 2011 and relevant circulars and guidelines issued by the Central Bank of Nigeria;
- b) establishes adequate internal controls to safeguard its assets and to prevent and detect fraud and other irregularities; and
- c) prepares its financial statements using suitable accounting policies supported by reasonable and prudent judgments and estimates and are consistently applied.

The Directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, the provisions of the NEXIM Act of the Federation of Nigeria 1991, the Financial Reporting Council of Nigeria Act No. 6, 2011 and relevant circulars and guidelines issued by the Central Bank of Nigeria.

The Directors are of the opinion that the financial statements present fairly, in all material respects, the financial position and the financial performance of the Bank as at and for the year ended 31 December 2019. The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the Directors to indicate that the Bank will not remain a going concern for at least twelve months from the date of this statement.

Signed on behalf of the Directors by:

Abubakar Abba Bello
Managing Director/CEO

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF THE NIGERIAN EXPORT-IMPORT BANK

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of the Nigerian Export-Import Bank ("the Bank") which comprise the statement of financial position as at 31 December 2019, and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Nigerian Export-Import Bank as at 31 December 2019, and of its financial performance and cash flows for the year then ended in accordance with the International Financial Reporting Standards as issued by the International Accounting Standards Board, and the relevant provisions of the Nigerian Export-Import Bank Act of the Federation of Nigeria 1991, the Financial Reporting Council of Nigeria Act No. 6, 2011 and relevant circulars and guidelines issued by the Central Bank of Nigeria.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and other independence requirements applicable to performing audit of the Nigerian Export-Import Bank. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code, and in accordance with other ethical requirements applicable to performing the audit of the Nigerian Export-Import Bank. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Building a better
working world

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF THE NIGERIAN EXPORT-IMPORT BANK - Continued

Key Audit Matters - Continued

Expected Credit Loss (ECL) assessment on financial instruments

The Bank has significant financial assets in its portfolio which are measured either at amortised cost or fair value through profit or loss. This amount to N99,446,804 (2018: N98,910,003) which represents about 93% (2018: 93%) of the total assets, and the associated impairment provision are significant to the financial statements. See note 13, 14, 15 and 16.

The Expected Credit Losses (ECL) involves the application of judgement and estimation in determining inputs for ECL calculation such as:

- ▶ Determining criteria for significant increase in credit risk (SICR) for staging purpose.
- ▶ Assessing the relationship between the quantitative factors such as default and qualitative factors such as macro-economic variables.
- ▶ Incorporating forward looking information in the model building process.
- ▶ Factors incorporated in determining the Probability of Default (PD), the Loss Given Default (LGD), the Recovery Rate and the Exposure at Default (EAD).
- ▶ Factors considered in cash flow estimation including timing and amount.
- ▶ Factors considered in collateral valuation.

These estimates are driven by a number of factors, changes in which might lead to a significant impact in the impairment value.

This is considered a key audit matter in the financial statements given the level of significance of the amount, and the complexity and judgement involved in the process, which required considerable audit time and expertise.

How the matter was addressed in the audit

Our audit approach was a mix of both control and substantive procedures.

- ▶ We reviewed the IFRS 9 model prepared by the management for computation of impairment on financial assets in line with the requirements of IFRS 9.
- ▶ We gained an understanding of how the Probability of Default (PD's) and Loss Given Default (LGD's) were derived by performing a walkthrough using live data.
- ▶ For loans classified under stages 1 and 2, we selected material loans and reviewed the repayment history for possible repayment default. We challenged the various factors considered in classifying the loans within stages 1 and 2 and in the measurement of ECL.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF THE NIGERIAN EXPORT-IMPORT BANK - Continued

Key Audit Matters - Continued

- ▶ For stage 3 loans, we challenged all assumptions considered in the estimation of recovery cash flows, the discount factor, and the timing of realisation. In instances where we were not satisfied with the assumption used by the management in its cash flow estimation and discounting, we challenged management assumptions by re-computing the cash flows to determine the recoverable amounts.
- ▶ We focused on the most significant model assumptions including probability of default and loss given default.
- ▶ We performed detailed procedures on the completeness and accuracy of the information used.
- ▶ We used our internal specialists to assess the appropriateness of the models used and to perform an independent recalculation of the impairment provision for the selected portfolios.
- ▶ We reviewed the qualitative and quantitative disclosures for reasonableness to ensure conformity with IFRS 7 - Financial Instruments Disclosures.

Other Information

The Directors are responsible for the other information. The other information comprises the Report of the Directors, Statement of Directors' Responsibilities in Relation to the Preparation of the Financial Statements, the Statement of Value Added and the Five-Year Financial Summary as required by the Companies and Allied Matters Act, CAP C20 Laws of Federation of Nigeria (CAMA) 2004 and the Financial Reporting Council of Nigeria, and the Financial Highlights. Other information does not include the financial statements and our Auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The Directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, the provisions of the NEXIM Act of the Federation of Nigeria 1991, the Financial Reporting Council of Nigeria Act No. 6, 2011 and the Central Bank of Nigeria circulars and guidelines and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Building a better
working world

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF THE NIGERIAN EXPORT-IMPORT BANK - Continued

Responsibilities of the Directors for the Financial Statements - Continued

In preparing the financial statements, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting processes.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Building a better
working world

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF THE NIGERIAN EXPORT-IMPORT BANK - Continued

Auditor's Responsibilities for the Audit of the Financial Statements - Continued

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our Auditor's Report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In accordance with the requirement of Schedule 6 of the Companies and Allied Matters Act, CAP C20, Laws of the Federation of Nigeria 2004, we confirm that:

- i) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- ii) in our opinion, proper books of account have been kept by the Bank, in so far as it appears from our examination of those books; and
- iii) the Bank's statement of financial position and statement of profit or loss and other comprehensive income are in agreement with the books of account.

Report on Compliance with Banking Regulations

- i) We confirm that our examination of the loans and advances was carried out in accordance with the Prudential Guidelines for licensed banks issued by the Central Bank of Nigeria.
- ii) Related party transactions and balances are disclosed in Note 30 to the financial statements in compliance with the Central Bank of Nigeria circular BSD/1/2004.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS

1. Corporate information

The Nigerian Export-Import Bank ("NEXIM" or the "Bank") was established by Act 38 of 1991 as an Export Credit Agency (ECA). The Bank, which replaced the Nigerian Export Credit Guarantee & Insurance Corporation earlier set up under Act 15 of 1988, has the following main statutory functions: provision of export credit guarantee and export credit insurance facilities to its clients, provision of credit in local currency to its clients in support of exports, establishment and management of funds connected with exports, maintenance of a foreign exchange revolving fund for lending to exporters who need to import foreign inputs to facilitate export production, maintenance of a trade information system in support of export business and provision of domestic credit insurance where such a facility is likely to assist exports.

The Bank presently provides short and medium-term loans to Nigerian exporters. It also provides short term guarantees for loans granted by Nigerian banks to exporters as well as credit insurance against political and commercial risks in the event of non-payment by foreign buyers. The Bank is also the government's National Guarantor under the ECOWAS Inter-state Road Transit programme.

NEXIM is a bank incorporated and domiciled in Nigeria. Its registered office is at Plot 975, Cadastral Zone AO, Central Business District, Garki, Abuja.

2. Accounting policies

2.1 Basis of preparation

The financial statements have been prepared on a historical cost basis, except for equity instruments measured at FVOCI. The financial statements are presented in Nigerian naira and all values are rounded to the nearest thousand (N'000), except when otherwise indicated.

Statement of compliance

The financial statements have been prepared in accordance with, and comply with, the International Financial Reporting Standards as issued by the International Accounting Standards Board, the provisions of the NEXIM Act of the Federation of Nigeria 1991, Companies and Allied Matters Act, the Financial Reporting Council of Nigeria Act, No. 6 2011 and relevant circulars and guidelines issued by the Central Bank of Nigeria.

Presentation of financial statements

The Bank presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 28.

Financial assets and financial liabilities are generally reported gross in the statement of financial position. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Bank and/or its counterparties

2.1.1 Changes in accounting policies and disclosures

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended 31 December 2018, except for the adoption of new standards effective as of 1 January 2019. The Bank has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Several other amendments and interpretations are applied for the first time in 2019, but do not have an impact on the financial statements of the Bank.

NOTES TO THE FINANCIAL STATEMENTS – Continued

IFRS 16 Leases

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for most leases under a single on-balance sheet model.

Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have significant impact for leases where the Bank is the lessor.

The Bank adopted IFRS 16 using the modified retrospective method of adoption with the date of initial application of 1 January 2019. The Bank elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application. The Bank also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option ('short-term leases'), and lease contracts for which the underlying asset is of low value ('low-value assets')

The effect of adoption IFRS 16 as at 1 January 2019 (increase/ (decrease)) is as follows:

	N'000
Assets	
Right-of-use assets	52,450
Prepayments	(52,450)
Total assets	
Total adjustment on equity (retained earnings)	

The adoption of IFRS 16 does not give rise to a lease liability as the Bank does not have an enforceable right to renew or extend its leases as at the end of the reporting period and the non-cancellable periods have been fully paid.

Nature of the effect of adoption of IFRS 16

The Bank has lease contracts for various buildings used as offices and other outlets. Before the adoption of IFRS 16, the Bank classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease. A lease was classified as a finance lease if it transferred substantially all of the risks and rewards incidental to ownership of the leased asset to the Bank; otherwise it was classified as an operating lease. Finance leases were capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments were apportioned between interest (recognised as finance costs) and reduction of the lease liability. In an operating lease, the leased property was not capitalised and the lease payments were recognised as rent expense in profit or loss on a straight-line basis over the lease term. Any prepaid rent and accrued rent were recognised under Other assets and Other liabilities, respectively.

At the date of initial application of IFRS 16, the Bank does not have any lease classified as a finance lease (as lessee).

Upon adoption of IFRS 16, the Bank applied a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The standard provides specific transition requirements and practical expedients, which have been applied by the Bank.

Leases previously accounted for as operating leases

The Bank recognised right-of-use assets for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. In all leases, the right-of-use assets were recognised based on the amount equal to the related prepaid and accrued lease payments previously recognised.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS – Continued

The Bank also applied the available practical expedients wherein it:

- * Used a single discount rate to a portfolio of leases with reasonably similar characteristics.
- * Applied the short-term leases exemptions to leases with lease term that ends within 12 months at the date of initial application.
- * Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.
- * Used hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

Below is a list of other interpretations and amendments that were effective for the first time in 2019 but do not have a significant impact on the Bank:

- i IFRIC Interpretation 23 Uncertainty over Income Tax Treatment
- ii Amendments to IFRS 9: Prepayment Features with Negative Compensation
- iii Amendments to IAS 19: Plan Amendment, Curtailment or Settlement
- iv Amendments to IAS 28: Long-term interests in associates and joint ventures
- v Annual Improvements 2015-2017 Cycle
 - (a) IFRS 3 Business Combinations
 - (b) IFRS 11 Joint Arrangements
 - (c) IAS 12 Income Taxes
 - (d) IAS 23 Borrowing Costs

2.2 Significant accounting judgments, estimates and assumptions

The preparation of the Bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Bank's accounting policies, management has made the following judgements and assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. Existing circumstances and assumptions about future developments may change due to circumstances beyond the Bank's control and are reflected in the assumptions if and when they occur. Items with the most significant effect on the amounts recognised in the financial statements with substantial management judgement and/or estimates are collated below with respect to judgements/estimates involved

Going concern

The Bank's management has made an assessment of the Bank's ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

Allowances for credit losses

Judgment is required by management in the estimation of the amount and timing of future cash flows when determining an impairment loss for loans and advances. In estimating these cash flows, the Bank makes judgments about the borrower's financial situation and the net realizable value of collateral. These estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the impairment allowance.

NIGERIAN EXPORT-IMPORT BANK
NOTES TO THE FINANCIAL STATEMENTS – Continued

An assessment of impairment takes into account data from the loan portfolio (such as credit quality, levels of arrears, credit utilization, loan to collateral ratios etc.), and concentrations of risk and economic data (including levels of unemployment, real estate prices indices, country risk and the performance of different individual groups).

Impairment of financial instruments

The Bank has applied some judgment in carrying out an assessment of whether credit risk on the financial asset has increased significantly since initial recognition and incorporating forward-looking information in the measurement of ECL.

Fair value of financial instruments

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values. Judgements and estimates include considerations of liquidity and model inputs related to items such as credit risk (both own and counterparty), funding value adjustments, correlation and volatility.

Defined benefit obligation – defined benefit plan

The cost of the defined benefit pension plan is determined using actuarial valuations. The actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rates, future salary increases, mortality rates and inflation rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, management considers the market yields at the end of each reporting period on government bonds due to non-availability of deep market in high quality corporate bonds.

The currency of government bonds is consistent with the currency of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables. Future salary increases are based on expected future inflation rates in Nigeria.

Property lease classification – Company as lessor

The Bank has entered into commercial property leases on its investment property portfolio. The Bank has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the commercial property and the present value of the minimum lease payments not amounting to substantially all of the fair value of the commercial property, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases. See note 18 for the insignificant portion use as investment property.

Significant judgement in determining the lease term of contracts with renewal options

The Bank determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Bank applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Bank reassesses the lease term if there is a

NIGERIAN EXPORT-IMPORT BANK
NOTES TO THE FINANCIAL STATEMENTS – Continued

2.3 Summary of significant accounting policies

significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g. a change in business strategy).

The Bank has concluded that its leases are only enforceable for the periods that payments have been made and has therefore not recognized any lease liabilities. This applies only to property leases.

(a) Foreign currency translation

The financial statements are presented in Nigerian naira (₦) which is the functional currency of the Bank.

Transactions and balances

Transactions in foreign currencies are initially recorded at the functional currency rate of exchange ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange at the end of the reporting period based on official exchange rates. All differences arising on non-trading activities are taken to 'Other operating income' in the profit or loss.

Non-monetary items that are measured at historical cost in a foreign currency are translated using the spot exchange rates as at the date of recognition. When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

(b) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Recognition and initial measurement

All financial assets and liabilities are initially recognized on the trade date, i.e., the date that the Bank becomes a party to the contractual provisions of the instrument. The Bank uses trade date accounting for regular way contracts when recording financial assets transactions.

A financial asset or financial liability is measured initially at fair value plus or minus, for an item not at fair value through profit or loss, direct and incremental transaction costs that are directly attributable to its acquisition or issue. Transaction costs of financial assets and liabilities carried at fair value through profit or loss are expensed in profit or loss at initial recognition.

(ii) Classification of financial instruments

NEXIM Bank classifies its financial assets under IFRS 9, into the following measurement categories:

- those to be measured at fair value either through other comprehensive income or fair value through profit or loss; and
- those to be measured at amortized cost.

The classification depends on the Bank's business model (i.e. business model test) for managing financial assets and the contractual terms of the financial assets cash flows (i.e. solely payments of principal and interest – SPPI test).

NIGERIAN EXPORT-IMPORT BANK
NOTES TO THE FINANCIAL STATEMENTS – Continued

2.3 Summary of significant accounting policies

The Bank classifies its financial liabilities as subsequently measured at fair value through profit or loss and amortised cost. Management determines the classification of the financial instruments at initial recognition.

(iii) Subsequent measurements

The subsequent measurement of financial assets depends on its initial classification:

Amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The gain or loss on a debt instrument that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is determined using the effective interest method and reported in profit or loss as 'Interest income'.

The amortized cost of a financial instrument is defined as the amount at which it was measured at initial recognition minus principal repayments, plus or minus the cumulative amortization using the 'effective interest method' of any difference between that initial amount and the maturity amount, and minus any loss allowance. The effective interest method is a method of calculating the amortized cost of a financial instrument (or group of instruments) and of allocating the interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts over the expected life of the instrument or, when appropriate, a shorter period, to the instrument's gross carrying amount.

Fair value through other comprehensive income (FVOCI)

(a) Debt instruments

Investment in debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The debt instrument is subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment gains or losses, interest revenue and foreign exchange gains and losses are recognized in profit and loss.

Upon disposal or derecognition, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in net gains on investment securities while the cumulative impairment loss recognized in the OCI and accumulated in equity will be reclassified and debited to profit or loss. Interest income from these financial assets is determined using the effective interest method and recognized in profit or loss as 'Interest income'.

The measurement of credit impairment is based on the three-stage expected credit loss model as applied to financial assets at amortized cost.

NIGERIAN EXPORT-IMPORT BANK
NOTES TO THE FINANCIAL STATEMENTS – Continued

2.3 Summary of significant accounting policies - Continued

The Bank subsequently measures all equity investments at fair value. For equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. Where the Bank's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments continue to be recognized in profit or loss as dividend income when the company's right to receive payments is established unless the dividend clearly represents a recovery of part of the cost of the investment. Changes in the fair value of financial assets at fair value through profit or loss are recognized in profit or loss.

All other financial assets are classified as measured at FVTPL. In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- 1) The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- 2) How the performance of the portfolio is evaluated and reported to management;
- 3) The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- 4) How managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- 5) The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realized.

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimize exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS – Continued

2.3 Summary of significant accounting policies – Continued

(b) Equity instruments - Continued

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- Features that modify consideration of the time value of money – e.g. periodical reset of interest rates.

The Bank holds a portfolio of long-term fixed rate loans for which the Bank has the option to revise the interest rate at future dates. These reset rights are limited to the market rate at the time of revision. The right to reset the rates of the loans based on the revision in market rates are part of the contractually agreed terms on inception of the loan agreement, therefore the borrowers are obligated to comply with the reset rates without any option of repayment of the loans at par at any reset date. The Bank has determined that the contractual cash flows of these loans are solely payments of principal and interest because the option varies with the interest rate in a way that is considered a consideration for the time value of money, credit risk, other basic lending risks and costs associated with the principal amount outstanding.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

(iv) Reclassifications

The Bank reclassifies financial assets when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and must be significant to the Bank's operations. When reclassification occurs, the Bank reclassifies all affected financial assets in accordance with the new business model. Reclassification is applied prospectively from the 'reclassification date'. Reclassification date is 'the first day of the first reporting period following the change in business model. Gains, losses or interest previously recognized are not restated when reclassification occurs.

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets that are debt instruments. A change in the objective of the Bank's business occurs only when the Bank either begins or ceases to perform an activity that is significant to its operations (e.g., via acquisition or disposal of a business line).

The following are not considered to be changes in the business model:

- A change in intention related to particular financial assets (even in circumstances of significant changes in market conditions)
- A temporary disappearance of a particular market for financial assets
- A transfer of financial assets between parts of the entity with different business models

When reclassification occurs, the Bank reclassifies all affected financial assets in accordance with the new business model. Reclassification is applied prospectively from the 'reclassification date'. Reclassification

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

date is 'the first day of the first reporting period following the change in business model. Gains, losses or interest previously recognized are not restated when reclassification occurs.

Financial liabilities are not reclassified after initial classification.

Financial assets under the amortized cost classification (i.e. business model whose objective is to collect the contractual cash flows) can still be held as such even when there are sales within the portfolio as long as the sales are infrequent (even if significant in value) or insignificant in value both individually and in aggregate (even if frequent).

However, if more than an infrequent number of such sales are made out of a portfolio and those sales are more than insignificant in value (either individually or in aggregate), the Bank will assess whether and how such sales are consistent with an objective of collecting contractual cash flows.

Modifications of financial assets and financial liabilities

(i) Financial assets

If the terms of a financial asset are modified, the Bank evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognized and a new financial asset is recognized at fair value. Any difference between the amortized cost and the present value of the estimated future cash flows of the modified asset or consideration received on de-recognition is recorded as a separate line item in profit or loss as 'gains and losses arising from the de-recognition of financial assets measured at amortized cost'.

If the cash flows of the modified asset carried at amortized cost are not substantially different, then the modification does not result in de-recognition of the financial asset. In this case, the Bank recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The amount arising from adjusting the gross carrying amount is recognized as a modification gain or loss in profit or loss as part of impairment charge for the year.

In determining when a modification to terms of a financial asset is substantial or not to the existing terms, the Bank will consider the following non-exhaustive criteria.

Qualitative criteria

Scenarios where modifications could lead to de-recognition of existing loan and recognition of a new loan, i.e. substantial modification, are:

- Extension of financial asset's tenor
- Reduction in repayment of principals and interest
- Capitalization of overdue repayments into a new principal amount
- Change in frequency of repayments i.e. change of monthly repayments to quarterly or yearly repayments
- Reduction of financial asset's tenor

On occurrence of any of the above factors, the Bank will perform a 10% test (see below) to determine whether or not the modification is substantial.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

Scenarios where modification will not lead to de-recognition of existing financial assets are:

- Change in interest rate arising from a change in MPR which is the benchmark rate that drives borrowing rates in Nigeria
- Bulk repayment of financial asset

Quantitative criteria

A modification would lead to de-recognition of existing financial asset and recognition of a new financial asset, i.e. substantial modification, if:

- The discounted present value of the cash flows under the new terms, including any fees received net of any fees paid and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial asset.

A modification would not lead to de-recognition of existing financial asset if:

- The discounted present value of the cash flows under the new terms, including any fees received net of any fees paid and discounted using the original effective interest rate, is less than 10 per cent different from the discounted present value of the remaining cash flows of the original financial asset.

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognized (see below) and ECL are measured as follows:

- *If the expected restructuring will not result in de-recognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset*
- *If the expected restructuring will result in de-recognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its de-recognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of de-recognition to the reporting date using the original effective interest rate of the existing financial asset.*

Modification gain or loss shall be included as part of impairment charge for each financial year.

(iii) Financial liabilities

The Bank de-recognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. This occurs when the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. In this case, a new financial liability based on the modified terms is recognized at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognized in profit or loss. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognized as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment (i.e. the modified liability is not substantially different), any costs or fees incurred adjust the carrying amount of the liability and are amortized over the remaining term of the modified liability.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

Impairment of financial assets

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined. The Bank's policies for determining if there has been a significant increase in credit risk are set out in the financial statements.

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Bank considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Bank may also consider a financial asset to be in default when internal or external information indicates that the Bank is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Bank. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Loss allowances for accounts receivable are always measured at an amount equal to lifetime ECL. The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

- Stage 1: When loans are first recognized, the Bank recognizes an allowance based on 12mECLs. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.
- Stage 3: Loans considered credit-impaired. The Bank records an allowance for the LTECLs.
- POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognized based on a credit-adjusted EIR. ECLs are only recognized or released to the extent that there is a subsequent change in the expected credit losses.

If, in a subsequent period, credit quality improves and reverses any previously assessed significant increase in credit risk since origination, depending on the stage of the lifetime 2 or stage 3 of the ECL bucket, the Bank would continue to monitor such financial assets for a probationary period of 90 days to confirm if the risk of default has decreased sufficiently before upgrading such exposure from Lifetime ECL (Stage 2) to 12-months ECL (Stage 1). In addition to the 90 days probationary period above, the Bank also observes a further probationary period of 90 days to upgrade from Stage 3 to 2. This means a probationary period of 180 days will be observed before upgrading financial assets from Lifetime ECL (Stage 3) to 12-months ECL (Stage 1).

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

a. The calculation of ECLs

The Bank calculates ECLs based on three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are as follows:

- **PD:** The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognized and is still in the portfolio.
- **EAD:** The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- **LGD:** The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Bank considers three scenarios (a base case, an upside and downside). Each of these is associated with different PDs, EADs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

Impairment losses and reversals are accounted for and disclosed separately from modification losses or gains that are accounted for as an adjustment of the financial asset's gross carrying value.

The mechanics of the ECL method are summarized below:

- **Stage 1:** The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR. This calculation is made for each of the four scenarios, as explained above.
- **Stage 2:** When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- **Stage 3:** For loans considered credit-impaired, the Bank recognizes the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.
- **POCI:** POCI assets are financial assets that are credit impaired on initial recognition. The Bank only recognizes the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the three scenarios, discounted by the credit-adjusted EIR.

NIGERIA EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

b. Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortized cost is recognized in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognized in OCI is recycled to the profit and loss upon derecognition of the assets.

c. Purchased or originated credit impaired financial assets (POCI)

At each reporting date, the Bank assesses whether financial assets carried at amortized cost and debt financial assets carried at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default or past due event;
- The restructuring of a loan or advance by the Bank on terms that the Bank would not consider otherwise;
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- The disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment.

For POCI financial assets, the Bank only recognizes the cumulative changes in LTECL since initial recognition in the loss allowance.

Loans that are more than 90 days past due are considered impaired.

d. Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, landed properties and vehicles. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position.

However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on periodic basis as deemed necessary.

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models.

e. Collateral repossessed

The Bank's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Bank's policy.

In its normal course of business, the Bank does not physically repossess properties or other assets in its loan portfolio, but engages external agents to recover funds, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/ obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the statement of financial position.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

f. Forborne and modified loans

The Bank sometimes makes concessions or modifications to the original terms of loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral.

The Bank considers a loan forborne when such concessions or modifications are provided as a result of the borrower's present or expected financial difficulties and the Bank would not have agreed to them if the borrower had been financially healthy. Indicators of financial difficulties include defaults on covenants, or significant concerns raised by the Credit Risk Department. Forbearance may involve extending the payment arrangements and the agreement of new loan conditions.

Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms. It is the Bank's policy to monitor forborne loans to help ensure that future payments continue to be likely to occur.

De-recognition decisions and classification between Stage 2 and Stage 3 are determined on a case-by-case basis. If these procedures identify a loss in relation to a loan, it is disclosed and managed as an impaired Stage 3 forborne asset until it is collected or written off.

From 1 January 2018, when the loan has been renegotiated or modified but not de-recognised, the Bank also reassesses whether there has been a significant increase in credit risk. The Bank also considers whether the assets should be classified as Stage 3. Once an asset has been classified as forborne, it will remain forborne for a minimum 12-month probation period. In order for the loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of its facilities have to be considered performing;
- The probation period required from the date the forborne contract was considered performing has passed (see above);
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period;
- The customer does not have any contract that is more than 180 days past due.

If modifications are substantial, the loan is derecognized. If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognized and ECL are measured as follows:

- if the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating cash shortfalls from the existing asset;
- if the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

g. Presentation of allowance for ECL in the statement of financial position

Loan allowances for ECL are presented in the statement of financial position as follows:

- Financial assets measured at amortized cost: as a deduction from the gross carrying amount of the assets;

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

h. Write-off

After a full evaluation of a non-performing exposure, in the event that either one or all of the following conditions apply, such exposure is recommended for write-off (either partially or in full):

- continued contact with the customer is impossible;
- recovery cost is expected to be higher than the outstanding debt;
- amount obtained from realization of credit collateral security leaves a balance of the debt;
- or
- it is reasonably determined that no further recovery on the facility is possible.

All credit facility write-offs require endorsement by the Board Credit and Risk Committee, as defined by the Bank. Credit write-off approval is documented in writing and properly approved by the Board Credit and Risk Committee.

A write-off constitutes a derecognition event. The write-off amount is used to reduce the carrying amount of the financial asset. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank's procedures for recovery of amount due. Whenever amounts are recovered on previously written-off credit exposures, such amount recovered is recognized as income on a cash basis only.

i. Forward looking information

In its ECL models, the Bank relies on a broad range of forward-looking information as economic inputs, such as:

- Exchange rates
- Inflation rates
- Interest rates

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material. Detailed information about these inputs and sensitivity analysis are provided in Note 4 in the financial statements.

Collateral and Netting

The Bank obtains collateral where appropriate, from customers to manage its credit risk exposure to the customer. The collateral normally takes the form of a lien over the customer's assets and gives the Bank a claim on these assets in the event that the customer defaults.

Collateral received in the form of cash is recorded on the statement of financial position with a corresponding liability. These items are assigned to deposits received from bank or other counterparties. Any interest payable or receivable arising is recorded as interest expense or interest income respectively.

The Bank's policy is to determine whether a repossessed asset is best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to its relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets that are determined better to be sold are immediately recognized as non-current assets held for sale at the lower of carrying amount and fair value less costs to sell at the date of repossession.

The loan agreement provides that, if an event of default occurs, all outstanding transactions with the counterparty will fall due and all amounts outstanding will be settled on a net basis. Financial assets and liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or to realize an asset and settle the liability simultaneously. In many cases, even though netting agreements are in place, the lack of an intention to settle on a net basis results in the related assets and liabilities being presented gross in the statement of financial position.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

Valuation of financial Instruments

The best evidence of fair value is a quoted price in an actively traded market. In the event that the market for a financial instrument is not active, a valuation technique is used. The majority of valuation techniques employ only observable market data and so the reliability of the fair value measurement is high. However, certain financial instruments are valued on the basis of valuation techniques that feature one or more significant market inputs that are unobservable. Valuation techniques that rely to a greater extent on unobservable inputs require a higher level of management judgment to calculate a fair value than those based wholly on observable inputs.

The main assumptions and estimates which management consider when applying a model with valuation techniques are:

- The likelihood and expected timing of future cash flows on the instrument. These cash flows are usually governed by the terms of the instrument, although judgment may be required when the ability of the counterparty to service the instrument in accordance with the contractual terms is in doubt. Future cash flows may be sensitive to changes in market rates;
- Selecting an appropriate discount rate for the instrument. The determination of this is based on the assessment of what a market participant would regard as the appropriate spread of the rate for the instrument over the appropriate rate; and
- Judgment to determine what model to use to calculate fair value in areas where the choice of valuation model is particularly subjective, for example, when valuing complex derivative products.

When applying a model with unobservable inputs, estimates are made to reflect uncertainties in fair values resulting from a lack of market data inputs, for example, as a result of illiquidity in the market. For these instruments, the fair value measurement is less reliable. Inputs into valuations based on unobservable data are inherently uncertain because there is little or no current market data available from which to determine the level at which an arm's length transaction would occur under normal business conditions. However, in most cases there is some market data available on which to base a determination of fair value, for example historical data, and the fair values of most financial instruments are based on some market observable inputs even when unobservable inputs are significant.

Given the uncertainty and subjective nature of valuing financial instruments at fair value, it is possible that the outcomes in the next financial year could differ from the assumptions used, and this could result in a material adjustment to the carrying amount of financial instruments measured at fair value.

Fair value measurement

The Bank measures financial instruments, such as, quoted equities, at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Bank. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

De-recognition of financial assets

The Bank de-recognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Bank neither transfers nor retains substantially all the risks and rewards of ownership and it does not retain control of the financial asset. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Bank is recognized as a separate asset or liability in the statement of financial position.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset transferred), and the consideration received (including any new asset obtained less any new liability assumed) is recognized in profit or loss.

De-recognition of financial liabilities

The Bank de-recognizes financial liabilities when, and only when its obligations are discharged, cancelled or expired.

When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

Write off

The Bank writes off a financial asset (and any related allowances for impairment losses) when the Bank's Credit team determines that the assets are uncollectible. Financial assets are written off either partially or in their entirety. This determination is reached after considering information such as the occurrence of significant changes in the borrower/issuer's financial position such that the borrower/issuer can no longer pay the obligation, or that proceeds from collateral will not be sufficient to pay back the entire exposure. For smaller balance standardized loans, charge off decisions are generally based on a product specific past due status. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to other operating income.

However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank's procedures for recovery of amount due.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

Income and expenses (Revenue recognition)

Interest income and expense

Interest income and expenses are recognized in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- The gross carrying amount of the financial asset; or
- The amortized cost of the financial liability.

When calculating the effective interest rate for financial instruments other than credit-impaired assets, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The EIR (and therefore, the amortized cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognizes interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognizes the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk. The adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the statement of financial position with an increase or reduction in interest income. The adjustment is subsequently amortized through interest revenue calculated using effective interest method in the profit or loss.

a. Amortized cost and gross carrying amount

The amortized cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance. The gross carrying amount of a financial asset is the amortized cost of a financial asset before adjusting for any expected credit loss allowance.

b. Calculation of interest income and expenses

The Bank calculates interest income and expense by applying the effective interest rate to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortized cost of the liability.

However, for financial asset that have become credit-impaired subsequent to initial recognition and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the effective interest rate to the net amortized cost of the financial asset. If the financial assets cures and is no longer credit-impaired, then the Bank reverts to calculating interest income on a gross basis.

For purchased or originated credit-impaired (POCI) financial assets, the Bank calculates interest income by calculating the credit-adjusted effective interest rate and applying that rate to the amortized cost of the asset. The credit-adjusted EIR is the interest rate that, at original recognition, discounts the estimated future cash flows (including credit losses) to the amortized cost of the POCI assets. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 Summary of significant accounting policies - Continued

c. Presentation

Interest income and expense presented in the profit or loss includes:

- interest on financial assets and financial liabilities measured at amortized cost calculated on an effective interest basis;
- interest on debt instruments measured at FVOCI calculated on an effective interest basis;
- the effective portion of fair value changes in qualifying hedging derivatives designated in cash flow hedges of variability in interest cash flows, in the same period as the hedged cash flows affect interest income/expense; and
- the effective portion of fair value changes in qualifying hedging derivatives designated in fair value hedges of interest rate risk.

Interest income and expense on other financial assets and financial liabilities at FVTPL are presented in interest income or interest expense.

Dividend income

Dividend income is recognised when the Bank's right to receive the payment is established, which is generally when the shareholders approve the dividend.

Rental Income

Rental income arising from operating leases on properties leased out by the Bank is accounted for on a straight-line basis over the lease terms and is included in other income due to its operating nature.

Fee and commission income

Fees and commission income and expense that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Other fees and commission income including account servicing fees, investment management fees, sales commission, placement fees and syndication fees are recognized as the related services are performed. When a loan commitment is not expected to result in the draw-down of a loan, the related loan commitment fees are recognized on a straight-line basis over the commitment period.

Other fees and commission expense relate mainly to transaction and service fees, which are expensed as the services are received.

(h) Cash and cash equivalents

Cash and cash equivalents as referred to in the statement of cash flows comprises cash on hand, non-restricted current accounts with central banks and amounts due from Banks on demand or with an original maturity of three months or less.

(i) Property, plant and equipment

Property, plant and equipment is stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment losses, if any. Changes in the expected useful life are accounted for by changing the depreciation period or method, as appropriate, and treated as changes in accounting estimates.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of equipment.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS – Continued

(i) Property, plant and equipment – Continued

Depreciation which commences when the asset is available for use is calculated using the straight-line method to write down the cost of property, plant and equipment to their residual values over their estimated useful lives. Land is not depreciated.

The estimated useful lives are as follows:

- | | |
|---------------------------|----------|
| • Buildings | 50 years |
| • Computer equipment | 4 years |
| • Plant | 4 years |
| • Motor vehicles | 3 years |
| • Furnitures and fittings | 5 years |

Property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in 'Other operating income' in the profit or loss in the year the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

(j) Intangible assets

The Bank's intangible assets comprise the value of computer software.

An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Bank.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the profit or loss in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

- Computer software - 4 years

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS – Continued

(k) Financial guarantees

In the ordinary course of business, the Bank gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the financial statements (within 'Other liabilities') at fair value, being the premium received. Subsequently, the liability is measured at the higher of the amount of the expected credit losses and the amount recognised less cumulative amortisation.

Any increase in the liability relating to financial guarantees is recorded in the profit or loss in 'Impairment charge'. The premium received is recognised in the profit or loss in 'fees and commission income' on a straight-line basis over the life of the guarantee.

(l) Employee benefits

(i) Defined contribution pension plan

The Bank operates a defined contribution pension plan in line with the Pension Reform Act, 2004. The plan is funded by contributions from the Bank and the employees. The Bank has no further payment obligations once the contributions have been paid. Contribution payable is recorded as an expense under 'Personnel expenses'. Unpaid contributions are recorded as a liability.

(ii) Defined benefit pension plan

The Bank operates a defined benefit pension plan which requires contributions to be made to a separately administered fund.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding net interest (not applicable to the Bank) and the return on plan assets (excluding net interest), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Bank recognises restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Bank recognises the following changes in the net defined benefit obligation under 'personnel expenses in profit or loss

- Service costs comprising past-service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income

(iii) Short-term benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service.

A liability is recognised for the amount expected to be paid under short-term cash bonus plans if the Bank has a present (legal or constructive) obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

(m) Provisions

Provisions are recognised when the Bank has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is presented in the profit or loss net of any reimbursement.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS – Continued

When a provision is no longer required, it shall be credited in the profit or loss.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

(n) Taxes

Current income tax

In accordance with section 23(1) (a) of the Company Income Tax Act, the profit of the Bank is exempted from income taxes.

(o) Right-of-use assets

The Bank recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities (if any). The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. The recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

Short-term leases and leases of low-value assets

The Bank applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases (i.e. below N1,532,500). Lease payments on short term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Prior year accounting policy on leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset (or assets) and the arrangement conveys a right to use the asset (or assets), even if that asset is (or those assets are) not explicitly specified in an arrangement.

Bank as a lessee

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Bank is classified as a finance lease.

Finance leases are capitalized at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Bank will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

An operating lease is a lease other than a finance lease. Operating lease payments are recognized as an operating expense in profit or loss on a straight-line basis over the lease term.

NOTES TO THE FINANCIAL STATEMENTS – Continued

3. Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

IFRS 17 Insurance Contracts

In May 2017, the IASB issued IFRS 17 Insurance Contracts (IFRS 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 Insurance Contracts (IFRS 4) that was issued in 2005. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features.

A few scope exceptions will apply. The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of IFRS 17 is the general model, supplemented by:

- * A specific adaptation for contracts with direct participation features (the variable fee approach)
- * A simplified approach (the premium allocation approach) mainly for short-duration contracts

IFRS 17 is effective for reporting periods beginning on or after 1 January 2021, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17.

Proposed amendments to IFRS 17

In June 2019, the IASB issued an exposure draft (ED) on proposed amendments to IFRS 17. The Board considered 25 concerns and implementation challenges raised by stakeholders and assessed whether to propose changes to the standard. The Board selected only those changes that, in its estimation, would not lead to a significant loss of useful information for investors, nor unduly disrupt implementation processes under way, nor risk undue delays in the effective date of IFRS 17.

The IASB proposes in the ED 12 targeted amendments to the standard in eight areas and asks stakeholders whether they agree with the proposed amendments. The eight areas of IFRS 17 subject to proposed changes are:

- Deferral of the effective date of IFRS 17 for one year, including an additional year of deferral for the application of IFRS 9 to qualifying insurance entities (i.e., qualifying insurers can apply IFRS 17 and IFRS 9 for the first time in reporting periods beginning on or after 1 January 2022)
- Additional scope exclusions
- Expected recovery of insurance acquisition cash flows from insurance contract renewals
- CSM relating to investment activities
- Applicability of the risk mitigation option for contracts with direct participation features
- Reinsurance contracts held - expected recovery of losses on underlying contracts
- Simplified presentation of insurance contracts in the statement of financial position
- Transition modifications and reliefs

IFRS 17 will have no impact on the Bank, as it does not issue insurance contract.

Interest Rate Benchmark Reform - Amendments to IFRS 9, IAS 39 and IFRS 7

In September 2019, the IASB issued amendments to IFRS 9, IAS 39 and IFRS 7 Financial Instruments: Disclosures, which concludes phase one of its work to respond to the effects of Interbank Offered Rates (IBOR) reform on financial reporting.

The amendments provide temporary reliefs which enable hedge accounting to continue during the period of uncertainty before the replacement of an existing interest rate benchmark with an alternative nearly risk-free interest rate (an RFR).

These amendments is effective annual periods beginning on or after 1 January 2020

The amendments to IFRS 9

The amendments include a number of reliefs, which apply to all hedging relationships that are directly affected by the interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

Application of the reliefs is mandatory. The first three reliefs provide for:

- The assessment of whether a forecast transaction (or component thereof) is highly probable
- Assessing when to reclassify the amount in the cash flow hedge reserve to profit and loss
- The assessment of the economic relationship between the hedged item and the hedging instrument

For each of these reliefs, it is assumed that the benchmark on which the hedged cash flows are based (whether or not contractually specified) and/or, for relief three, the benchmark on which the cash flows of the hedging instrument are based, are not altered as a result of IBOR reform.

A fourth relief provides that, for a benchmark component of interest rate risk that is affected by IBOR reform, the requirement that the risk component is separately identifiable need be met only at the inception of the hedging relationship. Where hedging instruments and hedged items may be added to or removed from an open portfolio in a continuous hedging strategy, the separately identifiable requirement need only be met when hedged items are initially designated within the hedging relationship.

To the extent that a hedging instrument is altered so that its cash flows are based on an RFR, but the hedged item is still based on IBOR (or vice versa), there is no relief from measuring and recording any ineffectiveness that arises due to differences in their changes in fair value.

The reliefs continue indefinitely in the absence of any of the events described in the amendments. When an entity designates a group of items as the hedged item, the requirements for when the reliefs cease are applied separately to each individual item within the designated group of items.

The amendments also introduce specific disclosure requirements for hedging relationships to which the reliefs are applied.

These amendment will not have significant impact on the Bank's financial statements when they become effective.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS – Continued

3. Standards issued but not yet effective - Continued

The amendments to IAS 39

The corresponding amendments are consistent with those for IFRS 9, but with the following differences:

- For the prospective assessment of hedge effectiveness, it is assumed that the benchmark on which the hedged cash flows are based (whether or not it is contractually specified) and/or the benchmark on which the cash flows of the hedging instrument are based, are not altered as a result of IBOR reform.
- For the retrospective assessment of hedge effectiveness, to allow the hedge to pass the assessment even if the actual results of the hedge are temporarily outside the 80%-125% range, during the period of uncertainty arising from IBOR reform.
- For a hedge of a benchmark portion (rather than a risk component under IFRS 9) of interest rate risk that is affected by IBOR reform, the requirement that the portion is separately identifiable need be met only at the inception of the hedge.

This amendment will not have significant impact on the Bank's financial statements when they become effective.

Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between IFRS 10 and IAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in IFRS 3, between an investor and its associate or joint venture, is 42recognized in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is 42recognized only to the extent of unrelated investors' interests in the associate or joint venture. The IASB has deferred the effective date of these amendments indefinitely, but an entity that early adopts the amendments must apply them prospectively. These amendments will currently have no impact on the financial statements of the Bank.

This amendment will have no impact on the Bank's financial statements when they become effective.

Definition of a Business - Amendments to IFRS 3

The IASB issued amendments to the definition of a business in IFRS 3 Business Combinations to help entities determine whether an acquired set of activities and assets is a business or not. They clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test. These amendments will currently have no impact on the financial statements of the Bank.

The Bank will apply this amendment when it becomes effective on 1 January 2020.

3. Standards issued but not yet effective - Continued

The Conceptual Framework for Financial Reporting

The IASB issued the Conceptual Framework in March 2018. It sets out a comprehensive set of concepts for financial reporting, standard setting, guidance for preparers in developing consistent accounting policies and assistance to others in their efforts to understand and interpret the standards. The Conceptual Framework includes some new concepts, provides updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts. It is arranged in eight chapters, as follows:

- Chapter 1 – The objective of financial reporting
- Chapter 2 – Qualitative characteristics of useful financial information
- Chapter 3 – Financial statements and the reporting entity
- Chapter 4 – The elements of financial statements
- Chapter 5 – Recognition and derecognition
- Chapter 6 – Measurement
- Chapter 7 – Presentation and disclosure
- Chapter 8 – Concepts of capital and capital maintenance

The Conceptual Framework is accompanied by a Basis for Conclusions. The Board has also issued a separate accompanying document, Amendments to References to the Conceptual Framework in IFRS Standards, which sets out the amendments to affected standards in order to update references to the Conceptual Framework. In most cases, the standard references are updated to refer to the Conceptual Framework. There are exemptions in developing accounting policies for regulatory account balances for two standards, namely, IFRS 3 and for those applying IAS 8. These amendments will currently have no impact on the financial statements of the Bank.

The Bank will apply this amendment when it becomes effective on 1 January 2020.

Definition of Material - Amendments to IAS 1 and IAS 8

In October 2018, the IASB issued amendments to IAS 1 Presentation of Financial Statements and IAS 8 to align the definition of 'material' across the standards and to clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.' The amendments clarify that materiality will depend on the nature or magnitude of information, or both. An entity will need to assess whether the information, either individually or in combination with other information, is material in the context of the financial statements. These amendments will currently have no impact on the financial statements of the Bank.

The Bank will apply this amendment when it becomes effective on 1 January 2020.

	Pension costs- Defined contribution plan		354,941	288,750
	Other employee cost		10,112	7,959
	Personnel expenses		2,184,137	2,145,230

10	Other operating expenses			
	Administrative expenses		1,279,881	948,838
	Staff travelling		249,433	237,623
	Directors' fee, salaries & expenses		208,606	203,161
	Professional fees		171,199	148,972
	Advertising and marketing		134,477	92,430
	Staff training		88,175	113,608
	Bad debt written off		69,557	-
	Auditors remuneration		21,000	21,000
	Staff relocation		16,490	14,494
	Loss from disposal of property, plant and equipment		1,817	-
	Short term lease expenses		1,019	-
	Other operating expenses		2,241,654	1,780,126

The Bank's auditors, Ernst & Young, was not engaged in any non-audit services in the years ended 31 December 2019 and 2018.

- 11 Income tax expense
The Bank is exempted from Company income tax in accordance with Section 14(1)(c) of the Nigerian Export-Import Bank Act 1991.

12 Earnings per share

Basic/diluted earnings per share amounts is calculated by dividing the net profit for the year attributable to ordinary shareholders by the weighted average number of ordinary share outstanding at the reporting date.

The following reflects the profit and share data used in the basic/diluted earnings per share computations:

	31 December	31 December
<i>in thousands of Nigerian Naira</i>	2019	2018
Profit for the year	2,059,644	1,094,584
<i>in thousands number</i>	2019	2018
Weighted average number of ordinary shares for basic/diluted earning per share	49,912,571	49,912,571
Basic/diluted earning per ordinary share (kobo)	4.13	2.19

There have been no other transactions involving ordinary shares between the reporting date and the date of completion of these financial statements which would require the restatement of earnings/(loss) per share. There was no ordinary shares with dilutive potential as at the reporting date.

13 Cash and cash in banks

As at		31 December	31 December
<i>in thousands of Nigerian Naira</i>	Note	2019	2018
Cash on hand		1,452	1,449
Cash in banks		3,922,075	5,843,322
		3,923,527	5,844,771
Allowance for impairment on cash in banks	13.1	(2,925)	(9,318)
Cash and cash in banks		3,920,602	5,835,453

Cash in banks earns interest at fixed rates based on the bank deposit rates. The Bank has not pledged any of its short-term deposits in order to fulfil collateral requirements.

Additions		-	50,000,000
Principal repayment		(2,550,000)	(2,530,357)
Interest accrued	5	1,332,537	1,149,343
Interest paid		(1,158,241)	(443,102)
Foreign exchange gain		(81,908)	(2,280,737)
At the end of the year		64,491,388	66,949,000

21.1 This relates to a loan granted to the Bank by the Ministry of Finance Incorporated at an annual interest rate of 1% in 2011 and repayment should be N1 billion per year after the expiration of the 5 year tenure of the loan. The Bank is currently engaging with Ministry of Finance for restructuring the repayment of the loan.

21.2 This relates to a loan initially obtained from African Development Bank (AfDB) under AfDB Export Stimulation loan being managed on behalf of the Federal Government of Nigeria ("FGN"). However, the loan has been fully paid by the FGN, therefore the balance on the account becomes payable to FGN by the Bank. The Bank accrues for the interest at the rate of 9% per annum as time value of money in respect of the balance until it is repaid.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

21 Debt securities issued and other borrowed funds - continued

21.3 This represents amount taken over by NEXIM Bank at its inception in 1991 from the Central Bank of Nigeria (CBN) on the export credit Rediscounting and Refinancing Facility (RRF) Scheme extended to exporters through participating banks. The amount involved is both the debt instruments and bank balances which got transferred to NEXIM Bank by the CBN. The seed fund was called CBN Perpetual Debenture with a coupon rate of 8% which was subsequently reduced to 6% per annum. The interest is payable quarterly while the principal sum is repayable to CBN on demand.

21.4 In 2015 African Development Bank (AfDB) granted a loan of \$200 million to NEXIM for onward lending to small and medium scale companies that engages in business activities that supports exports, the loan is backed by Federal Government sovereign guarantee. The principal and interest is repayable bi annually over a period of 9 years at the rate of 2.5% per annum. The loan is expected to be disbursed in four tranches (1st tranche \$50 million, 2nd tranche \$100 million, 3rd and 4th tranche \$50 million respectively). In 2015, a sum of \$50 million has been disbursed, and other tranches will be disbursed once it is confirmed that the first tranche disbursed is well utilised.

21.5 During the year 2018, the Central Bank of Nigeria granted a 50 billion Naira debenture with 2% coupon rate for 15 years to the Bank. This facility is to be disbursed to qualified export oriented enterprises which are duly registered or incorporated in Nigeria and have satisfactory credit report format in at least two credit banks. The loan facility shall be used for acquisition of plant and machinery for development of plantation for non-oil export business and working capital of non-oil export. The interest is due on quarterly basis on the aggregate principal amount of the facility.

The Bank has not had any repayment defaults of principal, interest or other breaches with regard to this obligation during 2019 and 2018.

22 Other liabilities

As at <i>in thousands of Nigerian Naira</i>	Note	31 December 2019	31 December 2018
Accrued expenses		1,144,826	1,104,861
Accounts payable and sundry creditors	22.1	4,816,896	3,184,811
Transformation grant	22.2	10,217	10,217
Ministry of Finance Incorporated-Political Risk/ Guarantee Fund	22.3	1,933,589	1,933,589
Post-employment pension (defined - contribution)		-	141,909
		7,905,528	6,375,387

22.1 Included in the amount is ₦2.313 billion (2018: ₦2.313 billion) due to the Federal Government of Nigeria under the defunct ADB Export Stimulation Loan "Managed funds" in respect of the recoveries made by the Bank under the Fund, which is yet to be remitted. The ₦2.313 billion is repayable on demand.

22.2 Transformation grant is the outstanding balance of the funds given to the Bank by the Federal Government to rebrand the Bank as part of the Bank transformation.

22.3 This balance relates to 7% import duty surcharge remitted by the Federal Ministry of Finance to the Bank to facilitate the provision of export credit insurance on political risk component of country risk and non-funded facilities by way of provision of guarantee instruments.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

23 Employee benefit obligations

Defined contribution plan

The defined contribution plan is a pension plan under which the Bank pays fixed contributions; there is no legal or constructive obligation to pay further contributions. The assets of the plan are held separately from those of the Bank in a fund under the control of trustees.

The total expense charged to profit or loss of ₦354.9 million (2018: ₦288.7 million) represents contributions payable to these plans by the Bank at rates specified in the rules of the plan.

Defined benefit plan

A defined benefit plan is a gratuity plan that defines an amount of gratuity benefit that an employee is entitled to receive on retirement, dependent on one or more factors such as age, years of service and salary. A full actuarial valuation by a qualified independent actuary is carried out every year.

The plan liability is measured on an actuarial basis using the projected unit credit method, adjusted for actuarial gains and losses. The defined benefit plan liability is discounted using rates equivalent to the market yields at the reporting date of government bonds that are denominated in the currency in which benefits will be paid, and that have a maturity approximating to the terms of the related pension liability.

Legacy fund represents funds invested by the Bank on behalf of Pension Fund under the erstwhile defined benefit pension scheme in 2005. Payments are made in monthly to the beneficiaries of the fund.

23.1 Net interest (recognised under personal expenses)

<i>in thousands of Nigerian Naira</i>	2019	2018
Interest cost on benefit obligation	60,706	53,283
Interest income on assets	(80,942)	(69,392)
Net interest	(20,236)	(16,109)

23.2 Net remeasurement losses recognised in other comprehensive

<i>in thousands of Nigerian Naira</i>	2019	2018
Remeasurement (losses)/gains on defined benefit obligation	(74,328)	9,030
Remeasurement losses on plan assets	(20,848)	(13,799)
Net remeasurement losses in OCI	(95,176)	(4,769)

The factors contributed to the net actuarial loss above are as follows:

<i>in thousands of Nigerian Naira</i>	2019	2018
Change in economics assumptions	(93,212)	60,229
Pension increases	24,093	(44,237)
Pensioner mortality	(5,209)	(6,962)
Total	(74,328)	9,030

23 Employee benefit obligations - Continued

23.3 Net employee defined benefit assets

As at <i>in thousands of Nigerian Naira</i>	Note	31 December 2019	31 December 2018
Defined benefit obligations	23.4	(494,971)	(408,492)
Fair value of plan assets	23.5	548,106	536,567
Retirement benefit assets		53,135	128,075

23.4 Changes in the present value of the defined benefit obligation are as follows:

As at <i>in thousands of Nigerian Naira</i>	Note	31 December 2019	31 December 2018
Opening defined benefit obligations		(408,492)	(407,978)
Interest cost		(60,706)	(53,283)
Remeasurement (losses)/gains on obligations		(74,328)	9,030
Benefits paid		48,555	43,739
Closing defined benefit obligations		(494,971)	(408,492)

There are currently no active member in the plan, as the plan relates to ex-staff who has retired prior to contributory Pension Reform Act.

Mortality in Service

The rates of mortality assumed for employees are the rates published in the A67/70 Ultimates Tables, published jointly by the Instituto and Faculty of Actuaries in the UK.

The following payments are expected contributions to the defined benefit plan in the future

As at <i>in thousands of Nigerian Naira</i>	Note	31 December 2019	31 December 2018
Between 1 and 10 years		53,135	128,075
		53,135	128,075

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

23 Employee benefit obligations - Continued

23.5 Changes in fair value of plan assets are as follows:

As at <i>in thousands of Nigerian Naira</i>	31 December 2019	31 December 2018
Opening fair value of plan assets	536,567	524,713
Interest income	80,942	69,392
Benefits paid	(48,555)	(43,739)
Remeasurement loss on plan assets	(20,848)	(13,799)
Closing fair value of plan assets	548,106	536,567
Actual return on the plan assets	60,094	55,593

The net benefit asset arising from the defined benefit obligation and the plan asset represents present value of economic benefit available in form of reduction in future contribution. Management has assessed if there is asset ceiling by comparing the present value of those future benefits with the surplus in the defined benefit plan. The latter was lower than the former, hence no need for asset ceiling.

The major categories of plan assets as a percentage of the fair value of total plan assets are as follows:

	2019 %	2018 %
Fixed term deposit	100	100

The principal assumptions used in determining pension obligations for the Bank's plan are shown below:

As at <i>in thousands of Nigerian Naira</i>	31 December 2019 %	31 December 2018 %
Discount rate	13.3	15.8
Future pension increases	6	6
Mortality rate	a (55) Ultimate Table rated down 5 years.	

23.6 Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

<i>in thousands of Nigerian Naira</i>	Mov	2019	2018
Discount rate	+1%	34,319	24,904
	-1%	(39,405)	(28,173)
Pension increase	+1%	(42,110)	(30,653)
	-1%	37,011	27,301
Mortality rate	+1 yr	(9,956)	(6,554)
	-1 yr	9,709	7,027

 At 31 December	49,912,571	49,912,571

In line with the provision of the NEXIM Act, the shareholding is equally shared between the Ministry of Finance Incorporated and Central Bank of Nigeria. The statutory share allocation is being paid over time.

Accumulated losses

Accumulated losses is the carried forward losses plus current profit attributable to shareholders.

Dividends

Dividends distribution to the Bank's shareholders is recognised as a liability in the financial statements in the period in which the dividends are approved by the Bank's shareholders. Dividends that are proposed but not yet declared are disclosed in the notes to the financial statements. Dividends on the Bank's ordinary shares are recognised in equity in the period in which they are paid or, if earlier, approved by the Bank's shareholders.

Fair value reserve

The fair value reserve includes the net cumulative change in the fair value of equity instruments measured at fair value through other comprehensive income until the investment is derecognised.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

24 Issued and paid up share capital and reserves - Continued

Regulatory risk reserve

The regulatory risk reserve includes the difference between the impairment on loans and advances computed based on the Central Bank of Nigeria Prudential Guidelines and the impairment loss computed using the expected credit loss model on loans and advances under IFRSs. While the impairment loss model computed under IFRS is charged to profit or loss, the excess of regulatory impairment loss over the impairment loss computed using expected loss model is warehoused here.

Statement of Prudential adjustments

In line with the same directive of the CBN, the Bank compared the provision based on the prudential guidelines with impairment under IFRS for comparative periods and additional transfer of ₦8,797,618 (2018: ₦11,158,693) were made as the impairment balance under IFRS was lower for the years."

<i>in thousands (unit/Nigerian Naira)</i>	31 December 2019	31 December 2018

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

26 Fair value measurement - continued

Set out below is a comparison, by class, of the carrying amounts and fair values of the Bank's financial instruments that are not carried at fair value in the financial statements. This table does not include the fair values of non-financial assets and non-financial liabilities. The table does not equally cover those financial instruments whose carrying amounts are reasonable approximations of fair values.

	Carrying amount		Fair value	
	31 December	2019	31 December	2018
<i>in thousands of Nigerian Naira</i>				
Financial Assets:				
Equity instruments at FVOCI	4,557,279	4,229,463	4,557,279	4,229,463
Loans and advances	62,992,804	44,249,701	71,411,311	46,294,617
Debt instruments measured at amortised cost	437,759	33,132,582	433,116	32,781,142
	67,987,842	81,611,746	76,401,705	83,305,221
Financial Liabilities:				
Debt issued and other borrowed funds	64,491,388	66,949,000	58,993,350	54,876,230
	64,491,388	66,949,000	58,993,350	54,876,230

Fair value of financial assets and liabilities

Below are the methodologies and assumptions used to determine fair values for those financial instruments in the financial statements:

Assets for which fair value approximates carrying value

The management assessed that cash and bank, due from banks, other receivables, other liabilities, loan from ADB/FGN/CBN approximate their carrying amounts largely due to the short-term maturities of these instruments.

Financial investment – Debt instruments measured at amortised cost/held to maturity (Nigerian treasury bills)

These are Federal Government of Nigeria securities which are fair valued based on quoted yield-to-maturity and days to maturity rates. The fair value of treasury bills is determined by reference to quoted yield to maturities of the instrument as published on the Financial Market Dealer Quotation (FMDQ) website. The fair values of the Nigerian Treasury Bills are classified under Level 2 in the fair value hierarchy. The FMDQ publishes the market yields on a daily basis, and the unadjusted yields are used to determine the prices.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

26 Fair value measurement - continued

Loans and advances

The fair values of loans and advances are based on cash flows discounted using a rate based on the market interest rate of borrowings. The discount rate equals the prime lending rate as set by the Central Bank of Nigeria at the reporting dates. The fair values are within Level 2 of the fair value hierarchy.

Debt issued and other borrowed fund

The fair values of the debt issued and other borrowed fund are based on cash flows discounted using a rate based on the market interest rate of borrowings. The discount rate equals the prime lending rate as set by the Central Bank of Nigeria at the reporting dates.

Unquoted equity instruments at FVOCI

Inputs for the asset or liability in this fair value hierarchy are not based on observable market data (unobservable inputs). This level includes equity investments with significant unobservable components.

As at <i>In thousands of Nigerian Naira</i>	Note	31 December 2019	31 December 2018
At 1 January		2,888,440	1,941,408
Impact of IFRS 9 remeasurement		-	672,978
Impact of IFRS 9 reclassification		-	88,950
At 1 January (restated)		2,888,440	2,703,336
Additions in the year		204,346	-
Total (loss)/gains recognised through OCI		(26,163)	185,104
At 31 December		3,066,623	2,888,440

Information about the fair value measurements using significant unobservable inputs (Level 3)

The estimated fair value per share of each of the unquoted equity instruments has been determined using the comparable valuation model (P/B ratio). The significant input into the model is average Price/Book ratio of three comparable companies that are listed (Afrexim Bank - \$0.88 and ABREC - \$1.61). The equity sensitivity measures the impact of a +/- 250bps movements in the comparative companies. The sensitivity of the fair values of investment in unlisted equities to changes in the P/B multiples of the comparative companies as at 31 December 2019 is as shown in the below table:

Description	Valuation technique	Significant input - Average P/B	Assumption (P/B multiples)	Fair values
AFREXIM BANK LTD	P/B multiples	\$0.88	Base Sensitivity of +2.5% Sensitivity of -2.5%	2,864 2,936 2,792
African Biofuel & Renewable Energy Company (ABREC)	Company P/B multiples	\$1.61	Base Sensitivity of +2.5% Sensitivity of -2.5%	202 207 197

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

27 Financial Risk management

27.1 Introduction

Risk is inherent in the Bank's activities, but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit risk, liquidity risk and market risk.

Risk management structure

The Bank's Risk Management functions are carried out by the Executive Committee, Enterprise Risk Management Committee and Management Credit Committee which are supervised by Board oversight committees, the Board Risk-Management Committee and the Board Credit Committee. The Bank's Internal Audit conducts independent inspections quarterly to ensure compliance with all credit guidelines, approval conditions, operating procedures, Bank policies and regulatory directives.

Risk measurement and reporting systems

The Bank subscribes to the Central Bank of Nigeria (CBN) Credit Risk Management System for information on credit history when considering credit applications. The Bank's policy also provides for a two-dimensional credit rating assessment of financial ratios in system involving the determination of an obligor rating and a facility rating for each exposure.

Risk mitigation

The Bank uses a diverse range of collateral types to actively mitigate against credit exposures. In so doing the Bank is guided by key eligibility criteria such as liquidity, marketability, legal certainty, amenability to pricing and zero material positive correlation with the underlying exposure.

To safeguard and ensure the effectiveness of collaterals, the Bank ensures inspection and revaluation of the collaterals at prescribed intervals.

Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location.

Risk asset portfolio is actively managed to promote liquidity, flexibility and diversification (i.e. limit concentration risk to any industry, sector, region or individual customer). In line with the CBN Prudential Guidelines, the Bank continually defines and reviews its target market. Sectoral limits are reviewed and reset annually in line with evolving business needs.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

27 Financial Risk management

27.2 Credit risk Management

27.2.1 Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

The Bank has established a credit monitoring process to provide early identification of problems militating against credit performance and taking necessary corrective action.

Trade areas that enjoy the support of the Bank are visible and invisible exports which include, but not limited to, primary commodities, manufactured and semi-manufactured goods, imports for production of export goods, solid minerals and services.

Eligible transactions include:

- All transactions connected with export of goods wholly or partly manufactured in Nigeria;
- All transactions connected with export of commodities which are exportable under the laws of Nigeria;
- All transactions connected with projects established for the production of export goods or for the production of inputs into the production of manufactured goods meant for export;
- All export-generating imports, principally raw materials, equipment and spare parts required by a manufacturing exporter; and
- All export of services.

Eligible borrowers/beneficiaries of the Bank's facilities/services are: Export Agencies and Exporters duly registered in Nigeria as limited liability companies or co-operative societies (whether as manufacturing, merchant exporters or service companies).

27.2.2 Impairment assessment

27.2.2.1 Definition of default and cure

The Bank considers a financial instrument in default and therefore Stage 3 (credit-impaired) for ECL calculations when the borrower becomes 90 days past due for short term lending while for project finance (medium term and long term lending), it is when the borrower becomes 180 days past due on its contractual payments.

As part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikelihood to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate. Such events include:

- Inability to meet up with payment deadline.
- Delay in implementation e.g. For project finance if a machine doesn't arrive as at when due.
- Working capital inadequacies
- Macro economic factors such as change in foreign exchange rate.

27.2.2.2 The Bank's internal rating and PD estimation process

The Bank's independent Credit Risk Department operates its internal rating models. The models incorporate both qualitative and quantitative information and, in addition to information specific to the borrower, utilise supplemental external information that could affect the borrower's behaviour. PDs are adjusted for IFRS 9 ECL calculations to incorporate forward looking information and the IFRS 9 Stage classification of the exposure. This is repeated for each economic scenarios as appropriate.

BOI Refinancing facility lending, Medium term
direct lending, short term direct lending, Loans
to staff

The borrowers are assessed by specialised credit risk employees of the bank. The credit risk assessment is based on a credit scoring model that takes into account various historical, current and forward looking information such as:

- * Historical financial information together with forecasts and budgets prepared by the client. This financial information includes realised and expected results, solvency ratios, liquidity ratios and other relevant ratios to measure the clients financial performance. Some of the indicators are captured in the covenants with the clients and are therefore measured with greater attention.
- * Any publicly available information in the clients from external parties. This includes external rating grades issued by rating agencies, independent analyst reports, press release and articles.
- * Any macro-economic or geographical information, e.g GDP growth relevant for the specific industry and geographical segments where the client operates.
- * Any other objectively supportable information on the quality and abilities of the clients management relevant for the company's performance.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

27 Financial Risk management - Continued

27.2.2.3 Exposure at Default

The exposure at default (EAD) represents the gross carrying amount of the financial instruments subject to the impairment calculation, addressing both the client's ability to increase its exposure while approaching default and potential early repayments too.

To calculate the EAD for a Stage 1 loan, the Bank assesses the possible default events within 12 months for the calculation of the 12mECL. However, if a Stage 1 loan that is expected to default in the 12 months from the statement of financial position date and is also expected to cure and subsequently default again, then all linked default events are taken into account. For Stage 2 and Stage 3 financial assets, the exposure at default is considered for events over the lifetime of the instruments.

The Bank determines EADs by modelling the range of possible exposure outcomes at various points in time, corresponding the multiple scenarios. The IFRS 9 PDs are then assigned to each economic scenario based on the outcome of Bank's models.

27.2.2.4. Loss given default

The Bank segments its portfolio into smaller homogeneous portfolios, based on key characteristics that are relevant to the estimation of future cash flows. The applied data is based on historically collected loss data and involves a wider set of transaction characteristics (e.g., product types) as well as borrower characteristics.

Further recent data and forward-looking economic scenarios are used in order to determine the IFRS 9 LGD rate for each group of financial instruments. When assessing forward-looking information, the expectation is based on multiple scenarios. Examples of key inputs involve changes in historical recoveries and outstanding exposure, payment status, collateral or other factors that are indicative of losses in the portfolio.

The Bank estimates regulatory and IFRS 9 LGDs on a different basis. Under IFRS 9, Moody's recovery rates are used for unsecured loans for all the product types (BOI refinancing, medium term lending, short term lending) so also LGD rates for secured loans are calculated based on the collateral values provided. The inputs for these LGD rates are estimated and, where possible, calibrated through back testing against recent recoveries. These are repeated for each economic scenario as appropriate.

27.2.2.5 Significant increase in credit risk

The Bank continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Bank assesses whether there has been a significant increase in credit risk since initial recognition. The Bank considered an exposures to have significantly increased in credit risk when the IFRS 9 lifetime PD has doubled since initial recognition.

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer/facility to the watch list. In certain cases, the Bank may also consider that events explained in Note 2.3 are a significant increase in credit risk as opposed to a default. If contractual payments are more than 30 days past due for short term lending and 90 days past due for project finance (medium term and long term lending), the credit risk is deemed to have increased significantly since initial recognition.

27.2.3 Analysis of inputs to the ECL model under multiple economic scenarios

An overview of the approach to estimating ECLs is set out in Note 2.3 Summary of significant accounting policies and in Note 2.2 Significant accounting judgements, estimates and assumptions. To ensure completeness and accuracy, the Bank obtains the data used from third party sources (Central Bank of Nigeria, Nigeria Bureau of Statistics, BMI Research, Trading Economics etc.) and a team of expert within its credit risk department verifies the accuracy of inputs to the Bank's ECL models including determining the weights attributable to the multiple scenarios. The following tables set out the key drivers of expected loss and the assumptions used for the Bank's base case estimate, ECLs based on the base case, plus the effect of the use of multiple economic scenarios as at 1 January 2018 and 31 December 2018.

NOTES TO THE FINANCIAL STATEMENTS - Continued

27.2.4 Collateral and other credit enhancements

Disclosure of credit quality and maximum exposure for credit risk per categories based on the bank's internal credit rating system and year-end stage classification are further disclosed on Notes 13.1, 14.1, 15.1, 16.1, 17.1. The following tables shows the maximum exposure to credit risk by class of financial asset. It also shows the total fair value of collateral, any surplus collateral (the extent to which the fair value of collateral held is greater than the exposure to which it relates), and the net exposure to the credit risk.

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are in place covering the acceptability and valuation of each type of collateral. The type of collateral obtained are in form of stock, landed property, guarantees and vehicles, bank guarantees, bill of sale, insurance bond, director's guarantee.

Management monitors the market value of collateral, and will request additional collateral in accordance with the underlying agreement. It is the bank's policy to dispose of repossessed properties in an orderly fashion. The proceeds are used to reduce or repay the outstanding claim. In general, the bank does not occupy repossessed properties for business use.

Commitments and guarantees

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. Even though these obligations may not be recognised on the statement of financial position, they do contain credit risk and are therefore part of the overall risk of the Bank.

NOTES TO THE FINANCIAL STATEMENTS

27 Financial Risk management - Continued

27.3 Liquidity risk and funding management

Liquidity risk is defined as the risk that the Bank will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises because of the possibility that the Bank might be unable to meet its payment obligations when they fall due under both normal and stress circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, and adopted a policy of managing assets with liquidity in mind and monitoring future cash flows and liquidity on a daily basis. The Bank has developed internal control processes and contingency plans for managing liquidity risk. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

Analysis of financial assets and liabilities by remaining contractual maturities.

The table below summarises the maturity profile of the undiscounted cash flows of the Bank's financial assets and liabilities as at 31 December.

Repayments which are subject to notice are treated as if notice were to be given immediately. However, The Bank expects that many customers will not request repayment on the earliest date. The Bank could be required to pay and the table does not reflect the expected cash flows indicated by the Bank's deposit retention history.

NOTES TO THE FINANCIAL STATEMENTS

27 Financial Risk management - Continued

27.4 Market risk

Market risk is the risk that the fair value or future cash flows of financial instrument will fluctuate because of changes in market prices. Market risk comprise three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk. Financial instruments affected by market risk include cash at banks, loans and borrowings, deposits and available-for-sale investments.

The sensitivity analyses in the following sections relate to the position as at 31 December in 2019 and 2018.

The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and the proportion of financial instruments in foreign currencies are all constant at 31 December 2019.

The analyses exclude the impact of movements in market variables on: the carrying values of pension and other post-retirement obligations; provisions; and the non-financial assets and liabilities.

The following assumptions have been made in calculating the sensitivity analyses:

The statement of financial position sensitivity relates to available-for-sale equity instruments

The sensitivity of the relevant statement of profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31 December 2019 and 2018.

The sensitivity of equity is calculated by considering the effect of any associated cash flow.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Bank's exposure to the risk of changes in foreign exchange rates relates primarily to the Bank's cash and bank balances and long term loan denominated in foreign currency.

The following tables demonstrate the sensitivity to a reasonably possible change in USD exchange rates, with all other variables held constant. The impact on the Bank's profit before tax is due to changes in the fair value of monetary assets and liabilities. The Bank's exposure to foreign currency changes for all other currencies is not material.

	Change in USD rate	Impact on Profit before tax N' 000
2019	+8% -8%	34,107 (34,107)
2018	+2% -2%	31,581 (31,581)

Equity price risk

The Bank's listed and unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Bank manages the equity price risk through diversification and by placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Bank's senior management on a regular basis. The Bank's Board of Directors reviews and approves all equity investment decisions.

At the reporting date, the exposure to mutual fund portfolio at fair value was N1,490 million (2018: ₦1,341 million). A decrease of 10% on the NSE market index could have an impact of approximately N149million (2018: N1,341 million) on the income or equity attributable to the Bank, depending on whether the decline is significant or prolonged. A change of 5% in the value of the mutual fund portfolio would only impact equity, but would not have an effect on profit or loss.

27.5 Interest Rate Risk

The management of interest rate risk against interest rate gaps limits is supplemented by monitoring the sensitivity of the Bank's financial assets and liabilities to various standards and non-standards interest rate scenarios.

NIGERIAN EXPORT-IMPORT BANK

NOTES TO THE FINANCIAL STATEMENTS - Continued

29 Contingent liabilities and commitments

The Directors are of the opinion that all known liabilities and commitments, which are relevant in the assessment of the state of financial affairs of the Bank, have been taken into consideration in the preparation of the financial statements.

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. These consist of undrawn commitments to lend.

Even though these obligations may not be recognised on the statement of financial position, they do contain credit risk and are therefore part of the overall risk of the Bank (see Note 27).

Letters of guarantees commit the Bank to make payments on behalf of customers in the event of a specific act, generally related to the import or export of goods.

Legal claims

Litigation is a common occurrence in the banking industry due to the nature of the business undertaken. The Bank has formal controls and policies for managing legal claims. Once professional advice has been obtained and the amount of loss reasonably estimated, the Bank makes adjustments to account for any adverse effects which the claims may have on its financial standing. At the reporting date, The Bank is involved in various litigation suits in the ordinary course of its business. The actions are being contested and the Directors are of the opinion that none of the cases are likely to have a material adverse effect on the Bank.

The Bank, in its ordinary course of business, is presently involved in 13 cases as a defendant (31 December 2018: 8) and 1 case as a plaintiff. The total amount claimed in the 13 cases against the Bank is estimated at N1.32 Billion (31 December 2018: N0.87 Billion) while the total amount claimed in the 1 case instituted by the Bank is N 800 Million.

3,500,001 -	4,000,000	2	5
4,000,001 -	5,000,000	33	28
5,000,001 -	6,000,000 & Above	25	41
		156	162

Key management personnel and their immediate relatives engaged in the following transactions with the Bank during the year:

	31 December 2019	31 December 2018
<i>in thousands of Nigerian Naira</i>		
Loans and advances	934,526	495,279
Interest income earned during the year	18,411	14,742

The Bank has applied the exemption granted by IAS 24 relating to the disclosure requirements in relation to related party transactions and outstanding balances with (a) a government that has control and significant influence over the Bank (b) another entity that is a related party because the same government has control or significant influence over both the Bank and the other entity.

31 Capital management

The Bank's objectives when managing capital, which is a broader concept than the equity on the face of statement of financial position, are:

- To maintain a set minimum ratio of total capital to total risk weighted assets in line with the regulatory requirement. The Bank's capital adequacy ratio is 0.2% (2018: 16%) compared to a minimum ratio of 10 per cent prescribed by the Central Bank of Nigeria;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns to shareholders and benefits to other stakeholders; and
- To maintain a strong capital position necessary for its long term financial health, and to support the development of its business.

The Bank is subject to capital requirements by a regulatory body such as the Central Bank of Nigeria (CBN).

The Bank maintains an actively managed capital base to cover risks inherent in the business and meet the capital adequacy requirements of the local banking supervisor, Central Bank of Nigeria. The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Central Bank of Nigeria supervising the Bank.

The Bank manages its capital structure and makes adjustments to it according to changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders. No changes have been made to the objectives, policies and processes from the previous years. However, they are under constant review by the Board.

Total regulatory capital expressed as a percentage of total risk- weighted assets		-6.0%	16%
Minimum Capital Requirement Ratio by CBN		10%	10%

32 Event after reporting period

There are no events after the reporting date that require adjustments in the financial statements. Management has assessed the impact of the COVID-19 on the going concern of the Bank and has concluded that the use of the going concern is appropriate and that the Bank will be able to recover its assets and discharge its liabilities in the foreseeable future for at least the next 12 months.

Since early 2020, the Coronavirus disease (COVID-19) outbreak across China and beyond has caused significant disruption to the society, impacting the Bank, its employees and customers. In Nigeria it is an evolving situation and the Bank is monitoring closely, any impact will depend on future developments which are highly uncertain, and the Bank is still quantifying the impact.

The lockdown of the Country due to the virus could adversely affect the result of operations and financial position in 2020. The impact of the outbreak on key macroeconomic indicators will be taken into consideration when determining the ECL estimate under IFRS 9 in 2020.

The Bank has performed a line-by-line analysis of its statement of financial position and has done an assessment of whether the current uncertainty may impact any of the amounts presented at 31 December 2019. Management has concluded however that the amounts recognised in the financial statement do not required further adjustment but will continue to monitor situation as new information becomes available and adjustment thereof will be reflected in the appropriate reporting period.

33 Approval of the financial statements

The financial statements were approved for issue by the Board of Directors on 8 May 2020.
